

Snap-On Smile redefines provisionals. It's non-invasive, it's easy and your patients will love it. No more messy temporaries or complicated procedures requiring too much of your chair time. Snap-On Smile's range of **versatile clinical applications** includes **Opening & Restoring Vertical Dimension, Removable Partial Denture, Implant Provisional and Attachment, and Esthetic/Cosmetic Smile Enhancement** (including alignment, whitening and severe crowding). Snap-On Smile is available as both a full arch (6 units or more) and as a partial arch (5 units or less).

Snap-On Smile Over an Existing Denture		Edentulous Spans > 40mm	

SNAP-ON SMILE STANDARD VS. ADVANCED CASES – PRODUCT PARAMETERS

Standard Snap-On Smile cases include those noted below. For more difficult, complex cases, **Snap-On Smile Advanced** is the optimal alternative, for which **Digital Preview Technology** and **Premium Consult** services allow you to ensure that the design of your more severe cases are made to your precise criterion. Snap-On Smile Advanced takes the guesswork out of complex case design and offers **predictability** every time.
